

Mini Speed Lab

1. Measure out three different metric lengths, (1,2, or 3 m each)
2. One person walks or runs at three different speeds through the three measured lengths.
3. Record the three different times that go with the three different lengths, in a data table.
4. Graph on a continuous line graph.
5. Give a short paragraph conclusion/statement about what you learned from this activity.

Distance (Meters) VS Time (Seconds)
